**SPRINT GOAL:** By the end of this sprint, we should have a window in which we can add an item to an order, send the order to the server and **see it in the database**.

The sprint goal was achieved.

PB-ID	ID	Task Title	Responsible	Estimate (hours)	Status
1	1	Design GUI	Robert + Kamil	6 (3*2)	Completed
1	2	Implement Utility Package	Daniel + Laura	4 (2*2)	Completed
1	3	Implement Model	Robert	6	Completed
1	4	Implement ViewModel (Includes making the ViewModelFactory + CustomerViewModel)	Robert	6	Completed
1	5	Implement View (Includes making the View Factory)	Kamil	6	Completed
1	6	Update Class Diagram	Robert + Laura	4 (2*2)	Completed
1	7	Document MVVM	Robert + Kamil	8 (4*2)	Completed
1	8	Test MVVM -> unit test for viewmodel	Robert + Kamil	4 (2*2)	Completed
5	9	Add Class about database to Class Diagram	Daniel + Laura	4 (2*2)	Completed
5	10	Implement Database Manager	Daniel + Laura	32 (16*2)	Completed
5	11	Document Database Manager	Daniel + Laura	4 (2*2)	Completed
5	12	Test Database Manager (properly documented -> integration test????)	Daniel + Laura	8 (4*2)	Started
5	13	Implement RMI	Kamil	2	Completed
5	14	Document RMI	Kamil	2	Completed

Sprint #2

Legend: ● Ideal Remaining Effort ● Actual Remaining Effort

WHAT WAS ACHIEVED:
- everything we set out to achieve (window works, the methods go all the way from the view to the database)

WHAT WENT WELL:
- no major obstacles
- obstacles were overcome (GUI not opening, imports being weird)
- documentation is solid

WHAT TO DO NEXT:
- set up database for everyone
- make sure the new repository is working
